Savings

Mulch production doesn't get any easier than this.

The Amerimulch ColorTrom 400 is the perfect solution for producers who want a simple, durable and high-volume coloring system.

The ColorTrom 400 uses the lowest horsepower (hp) per cubic yard of mulch produced. With the state-of-the-art Marksman technology it can generate **over** 400 cubic yards using 50 percent less hp than comparable models. The low hp and high rate of production are a result of a low-friction, low-wear design. The high pressure, colorant delivery system will apply a constant flow of colorant throughout the coloring process to produce an evenly coated, superior finish for your mulch product while using up to 50 percent less water than most systems use today.

Transform your product with the revolutionary, standalone machine that allows you to **Conquer the Yard.**

COLORTROM 400

Specifications

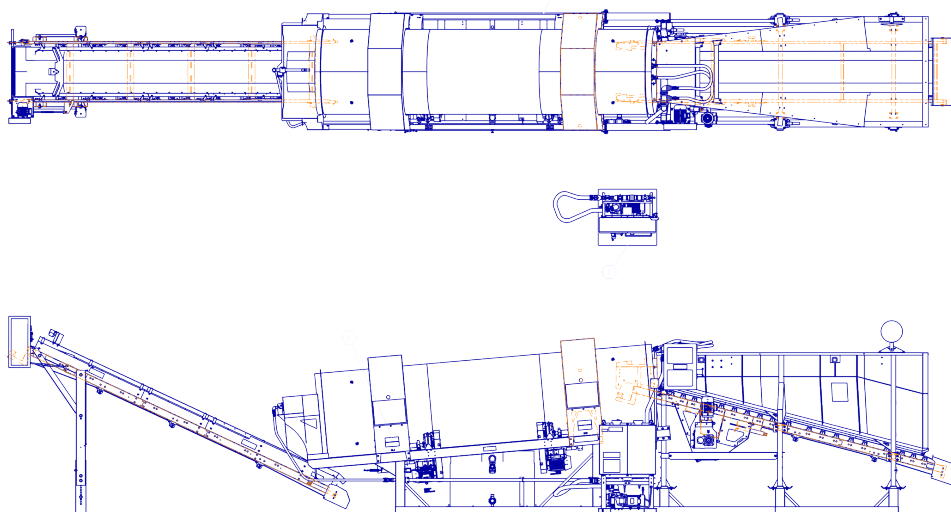

Production Capacity¹	400+ yards/hour
Water Usage²	8-20 gallons
Power Supply³	150 amps @ 480 volts, 3 phase
Feed Hopper	20 Cubic Yards
Marksman Technology	<ul style="list-style-type: none"> • Activates the colorant and water pump only when wood fiber is present • Ensures consistent, per-yard colorant cost • Easy access to production-rate and data-batch reporting

1. Production capacity is dependent on raw material bulk density and percentage of fines.

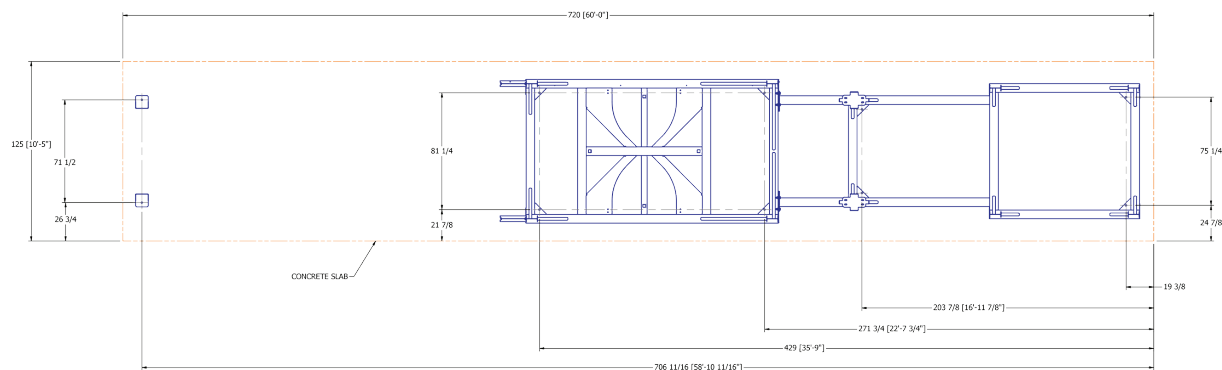

2. Water usage rates are directly dependent on particle size and fiber moisture content.

3. 3-phase generator is not supplied.
