

## Release Powder

This product allows for the clean release of texturing/imprinting tools from the concrete surface while at the same time providing antiquing or highlighting effects.

### Product Features and Benefits

- INNOTECH RELEASE POWDER is dry-mix of finely ground, streak free powder with a blend of UV-resistant pigments and water repelling agents designed for the clean release of mat-type texture or imprinting tools and texture rollers.
- INNOTECH RELEASE POWDER provides color variation to a textured surface with the antiquing or highlight effects for a look of natural stone.
- Select from the 42 standard colors of INNOTECH RELEASE POWDER from the INNOTECH COLOR HARDENER Color Chart.

### Product Application

- A surface is ready for Release Powder once no bleed water remains on the surface and the concrete is sufficiently firm to withstand the weight of texturing tools and a work crew. Evenly broadcast INNOTECH RELEASE POWDER over the entire freshly-placed concrete surface.
- INNOTECH RELEASE POWDER should remain in a dry state on the concrete surface (this product is not to be worked into the surface). Do not trowel this product into the wet concrete.
- INNOTECH RELEASE POWDER can be removed as soon as the concrete has hardened enough to not scratch or mar easily, approximately 2-3 days. The typical removal method is pressure washing the surface (but keep the spray nozzle 12-inches from the surface to avoid removing all the Release Powder). For hard to remove release powder or for heavy texture work with the release powder, use INNOTECH CON-CLEAN†.

### Coverage Information

Coverage rates may vary depending on the texture, porosity and condition of the concrete, application method, and other local conditions.

- ALL COLORS: 1,000 - 1,500 square feet, per 30-pound pail.

### Maintenance

INNOTECH highly recommends you develop and follow a schedule of routine maintenance for all colored concrete, so it maintains a quality appearance. Colored concrete installations should be routinely inspected, cleaned and resealed as required by the local conditions. Cleaning and resealing schedules will depend on a number of factors including, but not limited to, volume and intensity of traffic, maintenance procedures and weather.

### Production Limitations

- Inconsistencies on jobsite conditions, finishing practices, timing of texturing, and curing methods may impact the color in the finished product.

### Available Packaging

INNOTECH RELEASE POWDER is available in 30-pound pails.

### Product Shelf Life/Storage

Store INNOTECH RELEASE POWDER indoors, away from moisture. Shelf life: 24 months.

### Product Handling

Prior to using INNOTECH RELEASE POWDER please reference the corresponding Safety Data Sheet to ensure safe handling. Always wear gloves and eye protection and dust mask when handling product.

### Product Warranty

INNOTECH RELEASE POWDER is a proprietary product, warranted to be of uniform quality within our stringent manufacturing tolerances. As no control is exercised over the product use, no warranty is made as to the effects of such use (neither expressed or implied). Obligation of the seller and manufacturer under this warranty shall be limited to a refund of the purchase price of that portion of the material proven to be defective. The user assumes all other risk and liability resulting from uses of this product. Contact INNOTECH with any questions regarding this policy.
